Nlm Enfermeria Medico Quirurgica.Q: How to set up a 4TB partition as "Free Space"? I'm trying to set up my 4TB partition as "Free Space" as per this guide. However, I don't have any unallocated space. I only have two disks with 2TB in total. How can I fix this? A: If you have no unallocated space, your best bet is to expand the existing Ubuntu installation. I assume you're using Ubuntu's installer, the.iso that's downloadable from the Ubuntu website. You'll find the Ubuntu installation instructions on the download page. Read through them carefully and look in particular for the 'Using a CD or DVD' section. To expand the Ubuntu partition, you must boot from the CD or DVD. At the boot menu, choose the 'Try Ubuntu' option. Then, you'll have to use the Ubuntu installer to expand the Ubuntu partition. The installer will likely detect the free space on the disk and ask if you want to use it to expand the existing partition. If it doesn't, it's probably not in the same place as the Ubuntu installer can see it (probably in the middle of the disk, which is where partitioning tools tend to put the free space when it's in the same place as where the Ubuntu installer usually looks for it). You should be able to partition the disk then add the free space back to the partition. This is going to be quite painful if you're unsure of where the free space is and you're trying to do it from the hard disk. Q: Xamarin.forms Page.Current is null I am trying to navigate to page after the button click. I am using the following code in my view NavigationPage.SetHasNavigationBar(this, true); XAML
