Category:Photo software Category:Computer-related introductions in 2001 the regulation will not allow them to carry out these new SFO packages. This could affect the performance of the market participants who need to send or receive significant amounts of data. Issues Raised in Final Report of NCSC This conclusion is supported by the above analysis and the final report of NCSC which raised concerns about the implementation of SFO packages. While the NCSC report does not specifically mention the impact of SFO packages on the flow of traffic, the document does reference the need to look at the difference in traffic performance between a smooth and congested network. The final report, available in.pdf format, stated the following in paragraph 49 and the attached chart: Implementation impact on network congestion On a congested network, large SFO packages which would be in part delivered by traditional circuit switched networks would cause degradation of connectivity services to the subscriber. Delivering traffic based on one or more paths between source and destination (such as a mixture
