Environmental chemistry deals with the study of the origin, transport,. Organic Chemistry Of Soils – Environmental Chemistry for All. Chemical Kinetics Of Environmental Pollution – Chemical kinetics of environmental pollution.

Q: Django upload_to setting not working I have a simple upload view

```
def upload(request):
    file = request.FILES['file']
    path = os.path.join('uploads', str(uuid.uuid4()) + '.jpg')
    file.save(path)
    return redirect('/')
```

and model class

```
class Book(models.Model):
    image = models.ImageField(upload_to=upload_book, blank=True, max_length=100)
    description = models.TextField()
    date_added = models.DateTimeField(default=timezone.now)
    user = models.ForeignKey(User, on_delete=models.CASCADE)
    likes = models.ManyToManyField(User, through='Book_likes')
```

I want to set the upload path as /book/image.jpg but I can't figure out how to do it I'm running the latest Django version from git and python3

A: You need to read the documentation a bit more closely:

```
from django.conf import settings
settings.MEDIA_ROOT = os.path.join(settings.BASE_DIR, 'uploads')
settings.MEDIA_URL = '/uploads'
```

You need to specify the url to the upload in MEDIA_ROOT. Then you need to update your urls.py as follows:

```
from django.conf import settings
from django.conf.urls import include, url
from django.contrib import admin
urlpatterns = [ #... url(r'^uploads/book/(?P.+).jpg', 'app.views.2d92ce491b
```
