SpywareBlaster Crack + License Keygen Download [Win/Mac] [April-2022]

SpywareBlaster is a very effective tool designed to block out ActiveX spyware which attempts to infiltrate inside your computer, as well as prevent tracking cookies and helps you take a system snapshot. It focuses on adware, dialers, hijackers and several other threats involving spying and tracking. It does so by allowing you to set various filters and rules for browser clients installed on your system. Hassle-free installation and clear-cut GUI The setup process does not pose any problems, while the interface is easy to follow and quite easy on the eyes. It only encloses a navigation panel and a pane in which to display the selected information or options. As a result, it becomes quite clear that all user categories can learn how to handle it, without facing any kind of difficulties, even in the absence of Help contents. Support for multiple web browsers and disable or customize protection SpywareBlaster features support for Internet Explorer, a selection of IE-based browsers, such as Avant, SlimBrowser, Maxthon, GreenBrowser and Crazy Browser, as well as Firefox, Netscape, SeaMonkey, Pale Moon and K-Meleon. This program can detect all the web browsers you have installed on your computer, and shows you their protection status in the main window. If this is disabled you can enable the cookie and/or ActiveX safeguards, as well as customize the huge block list. You can also restrict actions in certain sites. Create a restore point and tweak some parameters System Snapshot is a very important function of SpywareBlaster, as it allows you to create or restore backups of important system and browser settings, using a wizard and a custom name. The settings panel allows you to configure web page settings for Internet Explorer (e.g. start page, search page, search bar), create encrypted backups for the Hosts file, completely disable Flash content and downloads, as well as create a list of ActiveX controls you want to block. SpywareBlaster is a very effective tool designed to block out ActiveX spyware which attempts to infiltrate inside your computer, as well as prevent tracking cookies and helps you take a system snapshot. It

focuses on adware, dialers, hijackers and several other threats involving spying and tracking. It does so by allowing you to set various filters and rules for browser clients installed on your system. Hassle-free installation

SpywareBlaster Crack + License Key Full

KeyMacro is a software with a strong base on key-association. Its interface is fairly simple and does not require to be configured. The software is completely free, no registration is required to use it and the download size is only 0.7 MB. Features: User-friendly interface Straightforward system Technical Requirements: KeyMacro can be used on all Windows-based operating systems (XP, 2000, 2003, Vista and 7). System Requirements: .NET Framework 1.1 or higher Windows XP or higher Installation process: To install KeyMacro, simply drag the KeyMacro folder to your desktop and double-click on it to launch the installation process. The installation is highly recommended because it will update the antivirus program you are already using. The program also does not require any additional tools to install. The interface of the program is quite simple. On the main window, the main tabs are Home, Options and Rules. The Home tab displays all the possible functions. The Options tab allows you to configure the main options, as well as some additional advanced options (mainly the antivirus and the process). The Rules tab allows you to create or edit rules, which will be applied automatically when you open a web page in a browser. To create a new rule, you need to select the browser and the site from which you wish to block certain key combinations. In order to edit a rule, simply double-click on it, so you can make changes. The User tab is displayed when you add a new user account and it allows you to manage the account by setting settings and properties (disable/delete/lock). To perform the same operation in the advanced settings, simply double-click on the user account, so you can set all the options you need. The Settings tab allows you to access the Global settings, such as the location of the settings file, the extension of the rule file and the list of installed browsers. The Tools tab allows you to set the web browser proxy for the Windows users. The Options tab gives you more options for advanced settings. You can define a rule action, as well as block the URL, IP address, full words and more. The Personal tab allows you to set your identification (which is required in order to edit a rule). KeyMacro is highly customizable and it allows you to create as many rules as you need. It also allows you to use keys for 77a5ca646e

SpywareBlaster

ActiveX Detection & Blocking - Registry Cleaner - Advanced... Are you looking for powerful AntiVirus and AntiSpyware software that can protect your system from being invaded by spyware, adware, keyloggers, dialers, botnet masters, spam and other online threats? If so you have found a safe solution: Stopinfect. Stopinfect allows you to block access to certain web sites, to prevent your computer from being infected with adware, spyware and potentially unwanted software. The software lets you choose the URL and search for it in the top search engines to find out if it is a trusted site. Then you can decide whether to trust the website or not. Stopinfect provides a number of options that can be easily customized to fit your personal needs. To block a website completely you only need to type the web address and click a button. You can also choose whether to block the site only for Windows, only for other users and whether to block the IP address of the site or the whole domain. Stopinfect is designed to be easy to use, yet comes with several sophisticated features that will help you fight online threats and unwanted programs on your computer. [*] Advanced URL Blocking: Get rid of dangerous URL addresses by simply typing them in. [*] Proxy Support: Allow specific web sites to access the Internet via a Proxy Server. [*] Advanced URL Filtering: Filters the list of possible URL's, so the program doesn't filter out what you want. [*] Regular Expression Support: You can use regular expressions with the URL list. [*] Multi-platform Support: Stopinfect works on Windows, Mac OS X and Linux. [*] Advanced Tuning: Control the process to block or unblock web sites and software. [*] Exclude RegEx Expressions: Stopinfect can block web sites, keyloggers, dialers and other software you don't want. [*] Exclude RegEx Expressions based on site name: Stopinfect can block web sites, keyloggers, dialers and other software you don't want. [*] Customize web sites and programs to be excluded: You can block and unblock web sites or specific software. [*] Download and install Stopinfect: Download Stopinfect today and start protecting your PC!

What's New In?
