ClearType Switch allows you to change your web browser setting to the advanced browser mode, which allows your web browser to automatically detect ClearType (Hinting) for you. For more details you can use the following website: Custom Browser w/o tray icon: This is a completely custom version of the Avant browser. It does not have a tray icon and it does not support the expandable tree feature. In addition, it does not provide a zooming/panning feature. New Tab: Adds a "New Tab" button to the browser in the taskbar. Window Scale: Sets the "window scale" property for the browser so that the browser window always stays at 100% of its previous width or height. This is useful when switching between windows in different display resolutions. Browser Background: Specifies the browser's background. Stacks tabs: Stack tabs are arranged horizontally, similar to the behavior of Internet Explorer 8. Open the most recently used tab: "Open the most recently used tab", you can define the most recently used tab. Fill your Dock with icons: Display icons on the Dock. Displays a Menu Bar: Adds a Menu Bar to the browser. History Context Menu: Adds a context menu to the browser's bookmark/history menu. This context menu can be used to show or hide the Search/History/Web services menus. Copy to Clipboard: Click the copy button to copy a selected web page to the clipboard. Copy as an email Attachment: Send the current window contents as an email attachment to a single recipient. Open URL from Clipboard: When an attachment is selected from the Clipboard, this option opens the link in a new window. Auto-Detect Browsers: The program will identify the browser and automatically open it. For example, the program can open Microsoft Internet Explorer, Mozilla Firefox, Safari or Google Chrome. Auto-Fix Spelling and Grammar: The program fixes spelling and grammar automatically while you browse. Auto-Save Tab: Changes the saved tab setting of a browser window to Auto-save after each navigation. Auto-Restore To Saved Tab: Changes the restored tab setting of a browser window to Auto-restore when you quit the program. Auto-Restore Last Closed Tabs: Changes the restored
