II is a software application  
designed to help you to learn  
Spanish vocabulary. You can  
study vocabulary, listen to  
mp3 files and play  
vocabulary. Spanish Animals  
II uses a different method  
from the original Animals  
program. In Animals  
program, it uses a list to  
store every animal that you

---

have heard in your life.

Animals II only stores every animal that you have not yet heard in your life. Animals II improves the learning program to use the most effective learning method to retain all the information.

Description: In this article the author, Ivo Černikov, describes his development of Spanish Animals I. The main idea behind this project was to create an educational instrument in the form of an applet. The applet should make it easier for the user to learn the names of animals in Spanish. The applet should not only offer the names of Spanish animals, but also help users to pronounce the names correctly. This article can

instrument, the game is intended to be fun. It contains multiple choice and fill in tests. The questions are classified in three levels.

1. Basic: It is intended to learn the animals vocabulary.
2. Intermediate: It is intended to introduce the word.
3. Advanced: It is intended to learn the word.

For each animal, you need to answer 10 fill in the blank questions. The answers must be taken from the word list which contains 800 words in

---

total. If you select one word from the word list for an animal, you will be presented with three options which will be the possible answers to the question. Selecting one of the options will cause the word to disappear from the word list. By selecting one word from the word list in the course, you will be awarded a score. If you select more than one word from the word list for an animal, you will receive bonus points. The bonus

---

points are earned based on how many words you choose. The higher the number of words you choose, the higher the bonus points. On the other hand, the animal that you select from the word list will be awarded with no points.

What's New : Version 1.0 has been released. - The app contains 200 questions. - There are three levels of difficulty. - The questions are classified in three levels
