The influence of dexamethasone and captopril on the anticonvulsant effects of carbamazepine and valproic acid in rats. Experiments were performed to evaluate the influence of dexamethasone and captopril on the anticonvulsant action of carbamazepine and valproic acid. Anticonvulsant activity of the drugs was assessed in pentetrazole and in the corneal-shock model of electrical seizure in rats. In the first study, the effect of dexamethasone on pentetrazole-induced seizures was determined after parenteral and oral administration of the drug. Dexamethasone given parenterally significantly (p

Polarographic investigation of iron(III) formation from quinoline. The iron(III) complex of quinoline (1-phenyl-1,2,3,4-t
