New game engine used to power FIFA 22 FIFA 20 Editor-In-Chief Richard Brooker said: "We've always been ambitious with our game engine and this time we wanted to push even further. The engine powering FIFA 22 is unlike anything we have released before – it's not only the most powerful in terms of making players look authentic, but it also has the added benefit of being the fastest-running in the series." Second-generation, pro-rated ratings system The second-generation, pro-rated ratings system is now the standard, the best of two forms of ratings established by the International Football Association Board (IFA) and FIFA, respectively. A TOTALLY NEW WAY TO PLAY FOOTBALL FIFA 20 introduced the Next Goal Play, the game's innovative new feature that allowed players to use their creativity to dictate the style of the match. Making the tools for players to create their own goals, dribble the ball through the line, or beat their marker 1-on-1, has now been fully unlocked. Using a free-flowing play is a tactical option designed to open up the game, offering different ways to play. NEXT GOAL TECHNOLOGY The Next Goal Technology enables players to have more control over how matches play out. With an improved set of interactive tools players can create their own style of match through a vast array of free-flowing and direct play styles, including through Dribbling, Pivoting, One-Touch Passing, Volley Bouncing, Manual Interception and One-on-One Behaviours. FIFA 20 introduced the Playmaker, the game's most powerful role in all forms of play and the one you can unlock at the Club Pro level. THE PLAYMAKER Playmaker Mode allows you to play as the hero in any area of the pitch, completely altering your style of play. For the first time in the series, you have the freedom to choose your desired method of play, including All-Rounder, Partner, Doubles, and Freekick specialist. One key aspect of Playmaker is that of the player's body swerve when pressured by an opponent. Pressing the action button will cause the player's body to swerve in the direction they are facing, either towards or away from the opponent.

Fifa 22 Features Key:

- Highly playable-enabled moving the further we have now with AI. We expect this will make your game more difficult.
