DAP Download Accelerator Plus 10.0.6.0 Crack By Team VIPER.1. Field of the Invention The present invention relates to a display device, and more particularly, to a display device in which a driving circuit is fabricated on a thin film transistor substrate of the display device. 2. Description of the Related Art A liquid crystal display (LCD) device displays images using optical anisotropy and polarization properties of liquid crystal molecules. The liquid crystal molecules have a thin and long structure, and the arrangement of the liquid crystal molecules may be controlled by applying an electric field to the liquid crystal molecules. An LCD device includes an LCD panel in which liquid crystal molecules are interposed between two substrates, and a driving circuit for driving the LCD panel. The driving circuit includes a gate driver for driving gate lines of the LCD panel, and a data driver for driving data lines of the LCD panel. The gate driver and the data driver are respectively attached to a terminal region of the LCD panel. The gate driver and the data driver may be
