HyperMotion Technology explains most of the gameplay innovations in FIFA 22, like the reliable on-pitch physics model, sliding players, second-person shooting, the dynamic intelligence of the AI and the high-intensity tag feature. The new motion capture suits collected in motion capture studios and on the pitch, represent the performance and specific training progress of more than 400 players from some of the world's best football clubs. Each player is recorded at a frame rate of 50 per second over a period of 1,000 frames. Players who use the body scanner in the stands can now use the new advanced scanner to upload their body scans to FIFA 22. The body scanner also allows players to be scanned outside of the virtual stadium, allowing for more control over player identity during matches. FIFA 22 has an impressive roster of motion capture players. Players recorded during motion capture sessions include the likes of Neymar Jr., Marco Verratti, David Alaba, Diego Godin, Robert Lewandowski, Karim Benzema and many others. Hypermotion Technology in FIFA 22: FIFA 22 introduces "HyperMotion Technology," which leverages the data collected from motion capture suits worn by real-life players to enable a new level of physics realism and physicality in gameplay.

Combining that data with artificial intelligence, hypermotion technology gives players a more accurate representation of their players' on-pitch behavior. The movement of all 22 players on the pitch is captured and used to power the game. Unlike other video games, the on-pitch physics in FIFA 22 can be customized to the players of different leagues. FIFA 22 introduces the Dynamic Intelligence (DI) system, which enables players to react in real-time to virtual teammates and opponents using specific, responsive, and unique reactions to player actions. DI covers all on-pitch behaviors, from tackling the ball, chasing down players and running with the ball to defensive positioning. AI in FIFA 22: In-game AI behavior changes based on the conditions present in the match. The on-pitch AI adapts to your play style. Changing your tactics by using the drop-down menu in the game allows you to quickly switch the difficulty level of the AI. For example, you can set the difficulty to one of four difficulties, which lets you control the tactical complexity of the AI. The AI
