There are new release of gnome 3.2 available for public from Friday and is now ready for download. Gnome is now 3.2.2 version which has lots of new features coming with them. If you are looking to upgrade you must have this version otherwise it will upgrade your system to gnome 3.2. And here is fresh gnome 3.2.2 official release for Ubuntu 11.04. The following are highlights of new features in Gnome 3.2: New Features \*  
Templates: Gnome 3.2 includes

---

many improvements for the templates system. Now, you can create an entire new template, or add preferences to an existing template.

- \* System monitor applet: `gnome-system-monitor` is now the standard way to view system information in the panel.
- \* Applet support: The new Applet support allows you to add applets directly to the panel. If you prefer the old method of adding Applets and other extras to the panel, you can now set this in `gconf`.
- \* Panel applications: The Panel applications allow you to add a

---

context menu to an applet on the panel. \* Network monitor: The network monitor is now being used by the default network manager, and can be installed by itself as a standalone applet. \* Network monitoring applet: A network monitoring applet has been installed by default. \* Panel icon view: The panel icon view now allows you to flip images in their palette instead of just the top or bottom row. \* Logout dialog: Logout dialog now includes much of the same functionality in GNOME 3.2. \*

---

Security and Privacy dialog: The Security and Privacy dialog is now a core part of GNOME 3.0. \*

Appearance dialog: The Appearance dialog now includes themes, wallpaper settings, window placement and other settings. \*

Software sources: The software sources dialog has been updated to show your software updates in a separate dialog with a "Check Now" button. \*

Software updates: The Software Updates tab is now included in the gnome-software update view. \*

Packagekit user interface: The

---

packagekit user interface is now a core part of GNOME. \* GNOME Software: GNOME Software is now the default software update tool in Ubuntu 11.04 and 11.10. \* GNOME Software Preferences: GNOME Software preferences are now included in the GNOME Control Center. \* System Accounts: System accounts (like user, system and domain) are now included in the user

Ocster Backup Business is a powerful business protection solution that allows you to protect your company and its files. It includes a backup utility, data protection service, virtual server host, and monitoring tool. You can buy Ocster Backup Business from over 100 retailers worldwide, including Amazon.com, Best Buy, Buy.com, Jet.com, ModMyi.com, and your favorite independent reseller. Your software should have equal

---

abilities to run on Windows, Linux and Mac. All CNET editors use free versions of the software at their home computers for testing Windows software. The Mac version of CNET Editors' Choice freeware and shareware are certified safe for the Mac.

Reader's Pick With the super-lazy of a brand name, Eye-Fi still makes some of the best wireless photo and video cards on the market. With a range that will let you shoot 4K video on the go, Photo Project launches with a wide array of controls. On top of

---

that, it's also got built-in GPS and remote shooting capabilities, making it an excellent option for family and vacation shots. Photo Project also offers a decent price for a card that's proven itself time and time again. All the big camera and phone-crowded venues from CES to MWC use trade shows and showcases to get the best out of the industry. The Consumer Electronics Show (CES) is the pinnacle of the tech world, where major and minor announcements happen right in front of your eyes. At CES 2019,

---

cameras take center stage, with drones, selfie sticks, and autonomous cars taking center stage as well. On the other side of the spectrum, the Mobile World Congress (MWC) is where we see phones and other carrier tools on display. Both events get vast audiences — people travel from far and wide to be there. The two shows even include fashion shows that are popular with the attendees. In between the noise and chaos, you can also find some more quiet zones where you can talk one-on-one

---

with manufacturers and developers. The two trade shows cater to different kinds of people. CES is for the gadgeteers: You will find gadgets and gizmos from a variety of manufacturers, along with people looking to buy specific gadgets. MWC, on the other hand, is for the people who only have eyes for the latest and greatest smartphone on the market. Buy.com has partnerships with manufacturers and retailers

**What's New In Ocster Backup Business?**

---

Ocster Backup Business is a powerful tool for backup, system monitoring and PC optimization. Its goal is to help you keep your data safe, so you can access it anytime, even if your computer becomes slow or fails entirely. Use Ocster Backup Business to Create scheduled or manual backups of your system Protect your PC using encryption Restore your files in case of system failure With Ocster Backup Business, it's easy to create multiple backup tasks for both

---

drive and folder based backups. You can also schedule these backups to take place automatically and safely, so you don't have to worry about losing your precious files. Read on to learn more about this file management software, and to see if it's worth downloading for your own PC. Intuitive task creation: Before you can use Ocster Backup Business for your backup purposes, you will need to create one or multiple tasks. Depending on how many you create, some of them will take a

---

little time for setting up. Ocster Backup Business is a bit tricky to set up in that regard because you will need to create tasks one-by-one, with only a limited view of their options available. However, your tasks will be activated instantly after creation, and will have all their options available for you to use. The maximum number of options you can use is the same as the number of your backup tasks. Rich set of options: Ocster Backup Business can perform various backup tasks. You can choose to back up an

---

entire system (including Windows files, folders, etc.), and schedule it to occur at any time. Or, you can back up only a single or multiple folders, including ones that are on removable drives. Depending on your preferences, you can also back up password protected, encrypted, or compressed folders. If you have any questions on how to use the program, have a look at Ocster Backup Business user manual before downloading. More options make backups safer: When you decide to protect your

---

files with a password, you can make this process much easier for yourself. Since Ocster Backup Business stores all of your data safely and securely, it will not be lost or corrupted during a restoration. In fact, Ocster Backup Business is able to detect and identify corrupted files that are encrypted using passwords and still have working files, so you will not be limited with the protection you can set up for your data. Strong encryption: One of the most useful aspects

---

**System Requirements:**

OS: Windows XP/Vista/7/8/8.1/10  
Processor: 2.5 GHz Pentium 4 or equivalent  
Memory: 256 MB RAM (1 GB RAM or more is highly recommended)  
Hard disk: 2 GB free space  
Graphics: video card with DirectX9 graphics drivers  
DirectX: DirectX9  
Network: Broadband Internet connection  
Sound Card: DirectX compatible sound card or equivalent  
Additional Software: Visual Studio 2010, DirectX SDK (version 8 or higher)
